

MEGALIGHT LED360° SOL 24W

DATA SHEET

230 VAC

SAFETY 24-42 VAC

Changeable dust – and painting protector

The MEGALIGHT LED360 SOL brings high quality light to the demanding conditions on the worksite, right on the spot where it is needed. The compact, lightweight and agile design makes it easily handled and stored. It is possible to install on the site by using the several different mounting options on the lamp, including the optional 600N magnet holder. The lamp can be protected by a dust – and painting protector in order to keep the optical parts of the lamp clean.

The structure is strong but lightweight because the components are made of the best quality materials. Still every component on the lamp is available as spare part, this makes the product even more long lasting and environmentally friendly.

The product is available as 230VAC or SELV 24-42VAC operating voltage.
